SUMMARY

Computer Applications postgraduate student (MCA, 94.3% aggregate) skilled in full-stack web development, Firebase-backed applications, and ML pipelines (TensorFlow, Scikit-Learn). Proficient in Python, Java, JavaScript, and SQL, with proven ability to deliver end-to-end solutions in team-based hackathon and academic settings. Seeking a Software Engineering / Full-Stack Development role.

EDUCATION

Banasthali Vidyapith

Master of Computer Applications (MCA) – Cumulative Aggregate: **94.3%**

GLA University

Bachelor of Computer Applications (BCA); **Aggregate: 83.3%**

Shriji Baba Saraswati Vidya Mandir

Intermediate (Class XII) – **84.4%** | High School (Class X) – **82.6%**

Rajasthan, India

July 2025 – May 2027

Mathura, India

July 2022 – May 2025

Mathura, India

Graduated May 2022

TECHNICAL PROJECTS

Technical Lab Support Web Application | *HTML5, Tailwind CSS, Firebase, JavaScript*

Built a continuous asset management platform for tracking lab equipment/inventory, cutting manual audit effort by an estimated [X]% through automated status tracking.

Developed a centralized administrative dashboard using Firebase Realtime Database to process transactional requests in real time under concurrent multi-user access.

Implemented client-side validation logic and a responsive, utility-first UI with Tailwind CSS, reducing malformed data entries submitted to the backend.

Full-Stack Skin Cancer Detection Portal | *Python, Flask, TensorFlow, REST APIs*

Trained a convolutional neural network (TensorFlow/Keras) for multi-class skin lesion classification, achieving [X]% validation accuracy on the test set.

Built and deployed a Flask backend with modular RESTful endpoints to securely handle image upload and inference requests.

Designed a web dashboard displaying live classification results, confidence scores, and automated diagnosis summaries for end users.

Student Risk Prediction System (SIH 2025) | *Python, Scikit-Learn, Pandas, Data Analysis*

Collaborated with a 6-member team for Smart India Hackathon 2025 to build a machine learning pipeline that flags students at academic risk.

Preprocessed raw student data – handling missing values and feature scaling with Pandas and Scikit-Learn – improving model input quality across [X]+ records.

Validated model performance through systematic testing, achieving [X]% classification accuracy and confirming runtime stability.

LEADERSHIP & ACHIEVEMENTS

Mayukh 2026 Technical Fest | *Sub-Core Member – Workshop Operations*

Coordinated logistics and scheduling for [X]+ technical workshops, managing cross-team communication for [X]+ participants.

National Cadet Corps (NCC) | *'C' Certificate Holder*

Developed leadership, discipline, and task-prioritization skills through structured drills, camps, and public service activities.

Cyber Security Awareness Seminar | *Lead Organizer & Coordinator*

Organized a knowledge-sharing session on threat detection, penetration testing techniques, and identity infrastructure security for [X]+ attendees.

Certifications & Workshops

Android App Development Masterclass – Banasthali Vidyapith

Advanced LaTeX & Debugging Workshop

TECHNICAL SKILLS

Languages: Java (Advanced Core Java, OOP), Python, SQL (MySQL), JavaScript (ES6+), C++, C#

Web Technologies: HTML5, CSS3, Tailwind CSS, React.js (Basic), Bootstrap, RESTful APIs

Backend & Databases: MySQL, Firebase Realtime Database, DBMS Concepts

Machine Learning & Analytics: TensorFlow, Keras, Scikit-Learn, Predictive Modeling, Data Preprocessing

Developer Tools: Git, GitHub, VS Code, NetBeans, IntelliJ IDEA, Agile/Scrum

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), SDLC
